

Stud-Xtract AC/DC+

ALLOY STEEL

DESCRIPTION

Specially engineered flux coated electrode that protects the threads during the welding process. Designed to remove broken studs, bolts, taps, drill bits, screw extractors, etc

CHARACTERISTICS

- EZ-STRIKETIP graphite striking tip
- Can also be used in horizontal position
- · Easy striking and re-striking
- Can be used with all grades of bolts
- High mechanical properties (125 000 psi)
- Saves times and money
- Low amperage and easy to use

Weld Nut Washer Parts Broken stud

TYPICAL APPLICATIONS

All broken studs, bolts, taps, drill bits, screw extractors, etc.

PROCEDURE

- 1 Get a nut and a washer
- 2 Choose a diameter of **Stud-Xtract** rod and set your welding machine to the recommended amperage
- 3 Put the electrode perpendicular on the center of the bolt and strike the arc
- 4 Build up stud until it sticks about 3 mm (1/8") over the casting. Do not direct the arc in the direction of the threads. Keep the electrode perpendicular and in the center of the hole to be filled.
- 5 Weld washer to stud build-up deposit.
- 6 Weld the nut to the washer and unscrew nut to remove stud

MECHANICAL PROPERTIES

Tensile strength: 125 000 psi (860 MPa)

Elongation: 30 - 35%

WELDING PARAMETERS

Diameter: 3.2 mm (1/8") 2.5 mm (3/32") 2.0 mm (5/64") Amperage: 90 – 110 A 60 - 80 A 35 - 55 A

Packaging: 0.5 Kg

Rév. : 21_08
